

Zen Dome Orgone Generators
Now Serving Central Alberta

Zen Domes Orgonite User Guide 2018

Zen Domes Orgonite

- Zen Domes are simple compounds which balance ambient energy by retuning Electro-Magnetic Energy (EMF) & Geopathic Stress (GS) into positive healing energy, with many easily confirmed health benefits
- Zen Domes do this continuously, 24 hours a day, 7 days a week

To view the current Zen Dome product line-up visit: www.karenholtonhealthcoach.com/shop/zen-dome-orgonite-products/ or [click here](#).

Why you want genuine Zen Domes Orgonite:

To qualify as a Zen Dome, the orgone generator must be precision-made, beautiful, and as unique as possible. Only the most effective orgonite is selected to become a Zen Dome.

All Zen Dome orgone generators are energetically double charged. I personally infuse each one with the intention of giving you the best results possible for your highest good. I also charge and activate the crystals within.

Zen Dome Orgone Generators are never mass produced in a factory. They are hand-made by small families, which are vetted to ensure safe working conditions, adequate pay, and that they adhere to universal humanitarian ethics.

Before they are sold, every Zen Dome is inspected, washed & polished dry, smudged with sacred smoke, blessed with intention (quantum entanglement), and then they are set in the sun while exposed to healing frequency music. Once you order the designs you most desire, your Zen Dome Orgone Generators will attune themselves to your life force energy, producing maximum effect. As a result, Zen Domes are created in small batches, and are available in a limited supply.

Zen Domes provide orgone generating technology to:

- 🌀 work continuously turning negative energy into positive, healing energy
- 🌀 purify the atmosphere and stimulate plant growth
- 🌀 dramatically diminish the harmful effects of EMF (Electro-Magnetic Frequency) radiation & Geopathic zones
- 🌀 stimulate positive mood and are a natural remedy for poor sleep patterns
- 🌀 help restore health to the body, mind and soul by interacting with the natural crystals (salts) and fluids found in the body
- 🌀 give you an edge so you get more of what you want out of life

Most Zen Domes provide the added influential properties of secondary crystals to improve your health and circumstances. As the quartz & other crystals emit their specialized healing frequency, they stimulate the secondary crystals to vibrate more intensely. Together, they emit an inaudible symphony of healing vibrations, which clear all of the chakras as it relaxes the body, and interacts with the natural crystals (salts) found in our blood and body tissues. Some Zen Domes also feature angels or sacred geometry.

Delivery policy: In keeping with my commitment to quality, Zen Domes take time to create, cure, energize and ship. You should receive your order within about 30 business days, or less.

Zen Domes & Spirituality:

Check out my suggestions on how to use Zen Domes within Healing/Sacred Spaces, found on Page 38 of this guide.

Understanding Frequency Vibrations

Everything produces frequency vibration: colour, sound, every cell of our body and even the stones and crystals of the earth.

As humans, we sense only a very limited selection of sound/colour vibration. Our auditory range when we are young is about 20 Hz to 20 KHz.

Crystals, like clear quartz, produce a frequency vibration of about 786,000 KHz, which pulses faster than the speed of light! Although we do not detect this frequency with our physical senses, this does not negate the powerful influence of the energetic frequency vibrations of everything around us.

As an introduction to this concept, I look to one of the pioneers in this field, Dr. Masaru Emoto. Many are

familiar with his experiments with words and their effect on water.

Dr. Emoto, in his book Water Crystal Healing: Music & Images to Restore Your Well-being, (2006) tells us about his experiments with music, and how these vibrations affect water crystals in a profound way.

Dr. Emoto states, “Music with the appropriate rhythm, tempo, tone, and melody can correct distorted frequencies within our cells, assisting our health and healing”.

On the following pages please read the Introduction from this book to learn how, in the same manner as music, **the crystals found in Zen Domes affect your environment and your well-being**. More about the positive influential frequencies produced by Zen Domes later in this guide.

Zen Dome Orgonite Guide 2018

INTRODUCTION

WHAT IF THERE WERE NO MUSIC?

What if there were no music at all in this world? Can you imagine such a development? No music, no concerts, no records, no karaoke, no CDs. No songs to sing. No music programs on the radio or television. It's difficult to even imagine. Without music, the world would be a boring place. Just thinking about such a world makes me depressed and stressed. Music has become such an integral part of our daily life that we can't live without it.

WHAT IS MUSIC?

In Japanese, we write the word *music* (音楽) as “enjoyment” (楽) of “sounds” (音). What is a sound? A sound invariably occurs wherever there is a vibration, so we could say that a sound is a vibration. (Although humans only hear sounds generated by vibrations between 15 Hz and 20,000 Hz, which are called audible sounds, all vibrations emit sounds.)

What, then, is a vibration? It is energy itself, moving through matter. As waves of energy disturb particles of matter, the particles move, like floating balls on water, going up and down with the wave pattern.

Music, then, is an art form through which we experience vibrations, which is actually energy itself.

THE SYMPHONY INSIDE OUR BODY

Our body is composed of upwards of 100 trillion cells. Surprisingly, the vibration of each cell is slightly different from those of other cells. This means that

each cell is generating a slightly different sound. With so many cells in our body, if we could use a high-quality microphone to collect all these sounds, we would hear a great symphony that is constantly being played inside our body.

In my research of vibrations within the body, I have found that the origin of any disease is a disturbance in the frequency within each cell. We could say that the more harmonious and the more beautiful our body's symphony is, the healthier both the body and mind should become. Conversely, when discordant vibrations increase, our body and mind will turn negative and finally a disease will become manifest. For this reason, great doctors of "the good ol' days" were able to find abnormalities in the body of a patient with only the help of a stethoscope.

CONTROLLING A VIBRATION WITH ANOTHER VIBRATION

It is not difficult to restore a distorted sound to its normal state: one can simply measure the wave form of the existing sound, shift its phase ninety degrees (that is, curving "down" where the original is curving "up"), and then play it alongside the original sound. The distorted sound will be cancelled out and no sound will be heard. This technology has already been applied to reduce the noise generated from the engine of a car.

The reason that we need music resides in this principle. The stresses of modern society distort the vibrations of the cells in our body. To assist these distorted vibrations in returning to normal, we choose music—vibrations—with the right rhythm, tempo, tone, and melody to cancel out the distortion. For this reason, music has been our companion since the dawn of human history, in many different forms, and continues to give us healing effects.

Zen Dome Orgonite Guide 2018

“SEEING” MUSIC

Music is meant to be heard. But using the technique of water-crystal photography that I developed years ago, it is possible to “see” music. It works in the following manner: a water crystal is a geometrical design shaped by a vibration, and a sound is a vibration. So if you listen to a piece of music and look at the water crystal created by the vibration of that music simultaneously, you can “see” the vibrational pattern of the music in the crystal and absorb all the vibrations into your body through your eyes and ears.

MUSIC THERAPY

Organs and diseases have measurable *hado*, a subtle form of energy that is easily transmittable and present in all things. In English, *hado* translates as “wave motion” or “vibration.” In the near future, as research progresses, the *hado* associated with all organs and diseases will become clear and widely understood. Then, it will become possible to compose music that has vibrations and rhythm corresponding to a certain organ or disease—for example, a piece of music that can cancel the *hado* of liver cancer.

I imagine that, at some future time, the technology to help people absorb beneficial vibrations will be widely adopted. When that day comes, a water-crystal representation of a piece of music will be placed on the music’s packaging, and listeners will be able to enjoy music that is composed of the vibrations that are most beneficial to them. They will select music with the water-crystal image they are most attracted to at that moment and will receive healing effects from “seeing” as well as “hearing” the vibration. While enjoying the music, listeners can not only reduce their diseases but also prevent them.

THIS MUSIC SERIES

Until such a day arrives, I have collected these pieces of classical music, which my research has shown to produce beautiful crystals that suggest healing and well-being.

I'd like to describe the process of this research. We start with the premise that water has an ability to memorize various kinds of information. Because music is a assemblage of vibrations, it can be said that the difference in separate pieces of music is the difference in vibration. Water-crystal photography is a technique that can express the quality of each piece of music with a visual image. The water-crystal photographs in this collection of music were taken after each piece of music contained in the CD was played to distilled water. Here is a brief explanation of how we do this.

1. First, we play each piece of music with a set of speakers to the vial filled with distilled water.
2. We place about 1 ml of the water sample onto each petri dish. We do this with fifty dishes for each water sample.
3. We freeze the water contained in the fifty petri dishes at a temperature of -25 to -30 degrees centigrade.
4. Illuminating the frozen ice on each petri dish under a light microscope, we observe each water crystal and take sequence photographs with a magnification of 100X to 200X. These observations and photographs are made inside a large, cold room at -5 degrees centigrade.

It is the tip of the frozen and expanded ice that produces a water crystal. The ice block that is taken out of the freezer melts gradually because of the

Zen Dome Orgonite Guide 2018

temperature difference and the light from the microscope. At this moment, the water crystal at the tip of the ice block shows the expression of water that has resonated with each beautiful piece of music. The technique of water-crystal photography can capture this moment as a picture. We continue to take beautiful images that complement each selection of excellent music we test.

But that is not all. The next step is to measure the hado contained in a water-crystal photograph. Let me explain how I came to measure the hado of photographs. For over fifteen years, I have successfully used a hado-measuring device, called a Magnetic Resonance Analyzer (MRA), to measure the characteristics of hado and adjust the balance of the human energy field. To do a hado measurement on a person, the client places his or her palm on the MRA's measuring plate. I have found that if the client cannot be there in person, a photograph of the client works equally well in getting a hado measurement. Once the hado has been assessed, we can transfer to water a hado that counteracts any negative hado generated with the MRA. This is possible because water can memorize hado, which is vibration. The client then drinks the hado water, which corrects the disturbance in his or her energy balance, activates immunity, and facilitates self-healing power.

Now, let's return to music. When we began to measure the hado of a piece of music, we found it difficult to do so directly, because music has no visible form. However, it became possible to measure the hado of music by measuring the hado of the water-crystal photographs of water that was exposed to the piece of music. By combining the water-crystal photography and hado-measuring techniques, the healing effects of music become very clear and concrete.

My associates and I exposed water to pieces of music, observed the resulting water crystals, and took photographs. At the same time, we measured characteristics of the hado of each photograph with the MRA. Based on the hado data, we could infer the potential healing effects of each piece of music in terms of its hado effect.

In our experiments, we used timeless pieces of music that have resonated well with people for many years. Accompanying the photographs is a brief history of each musical selection and its composer so that you can connect with the emotions and hado of the original composer while you fully enjoy the music.

To use this book and CD set, please read each piece's history and hado qualities first and then enjoy both the lovely music and the corresponding beautiful water-crystal photographs. As you do so, visualize each organ in your body, as described in the commentary, with great appreciation for the organ. The concentration of consciousness created by visualizing each organ and the wonderful, beneficial synthesis between seeing and hearing can impart healing effects unlike any you have previously experienced.

Zen Dome Orgonite Guide 2018

At the heart of each Zen Dome is a clear quartz, or other piezoelectric crystal. Did you know that quartz crystals are neither solid nor liquid? They are a fluid, which grows and flows and vibrates at 786,000 pulses a millisecond.

When under pressure, the end points become polarized (piezoelectric) and the charge is dispersed as the vibrational frequency of 786,000 KHz. Its continuum moves faster than light and its vibration is the axis of the universe.

A distinctive quality of the quartz crystal is its ability to clear/wash/purify the energy around it. This is why, you can place any item close to it, (I.e., jewellery, other crystals, etc.), and they are energetically cleansed within hours.

Another special ability of quartz is that you can program the crystal with your intention, and charge it with specific energy, be it from nature or people. The crystal will hold specific thoughts, or a quality of energy that you ask it to hold.

To charge it with energy from nature, expose the crystal to any natural spot. The crystal will absorb and carry that energy for you.

Have you been amazed by how modern technology can store vast amounts of data into one tiny little micro-chip? All of that information is stored in a tiny quartz crystal!

Since Zen Domes contain clear quartz and other crystals, they too can be personalized and programmed.

Clear quartz is considered the Universal Crystal, and due to its cleansing properties, it self-cleans and purifies the other crystals bound up with it in the orgonite matrix.

I recommend exposing them to sunshine and a natural environment once in a while to keep them robust, and of course you can program your Zen Dome with your own intentions any time you wish.

Want a more fulfilling, abundant life?

Zen Dome Orgonite Guide 2018

Zen Domes and EMF

[Moon Gow Diamond](#)

The natural world, including your body, produces electromagnetic fields. But these fields are low in intensity. Technology produces much more intense electromagnetic fields, and these fields can cause health risks. You cannot see or hear them. But if you live where there is cell phone service

or power lines, for example, you are exposed to artificial EMFs.

Electro-Magnetic Frequencies come from cell phones, cordless phones, mobile antennas, smart meters, broadcast towers, electrical security systems and more. The higher the frequency, the greater the risk to health. For example, microwaves are very-high-frequency (VHF) radiation, and they can pose a significant health risk. Many cell phone towers operate in the microwave range.

Naturally occurring bioelectrical signals help to regulate many processes of the human body. In fact, science suggests that every cell in your body might have its own EMF.

However, strong artificial EMFs can enter your body and interfere with the natural way your body works. This can affect virtually any system within your body,

from your sleep cycles to your stress levels to your immunities to your DNA.

This is why you benefit from Zen Domes. Zen Domes are orgone generators: a simple compound which balances ambient energy by converting negative energy (EMF) into positive healing energy (Chi, Prana, Zero Point, etc.), with many easily-confirmed health benefits. Zen Domes Orgonite do this continuously, 24 hours a day, 7 days a week.

[Tree of Life Pendant](#)

How do Zen Domes restore health to the body, mind and soul? The frequency vibrations they produce interact with, and positively influence the natural crystals (salts) and fluids found in the body.

Zen Domes also essentially create positive energy transmitters out of any and all emitters of harmful negative energy by transforming their frequency.

There are multiple health benefits reported from regularly keeping orgonite nearby. As the crystal emits its specialized healing frequency, it stimulates the secondary crystals and stones to vibrate more intensely. Together, they emit an inaudible symphony of healing vibrations, which clear all of the chakras as they relax the body, and interact positively with our own natural resonant frequencies.

The best way to know what Zen Domes will do for you is to try them out for yourself!

[Large Pet Orgonite](#)

Zen Dome Orgonite Guide 2018

Zen Domes & Wellbeing

Orgonite Pendants

All Zen Dome orgone generators contain a piezoelectric crystal. Quartz is used for focusing the mind, healing, meditation and spiritual growth. Its helical spiral crystalline form radiates all the colour vibrations found in the light spectrum, producing a harmonizing, balancing effect.

All Zen Dome orgonite amplify and purify energy, restoring health to the body, mind and soul. Further, clear quartz stimulates the immune system and is a powerful protection stone. Holding a quartz crystal in your hand actual doubles your bio-magnetic field and dispels static electricity.

Zen Domes generate a positive electromagnetic field of healing frequency, and when arranged within the home or office in a grid-like fashion, they intensify the effect of each other, extending their range and producing an energetic environment which is conducive to harmony and healing. Even your plants and pets benefit.

Further, the tactical deployment of small pieces of orgonite near any and all sources of life-negative energy, (such as cell phone towers, nuclear power plants, underground bases and natural Earth energy grid-lines and vortices), will bring about specific life-positive,

cleansing, healing, effects.

As seen on page 2 of this guide, in order to qualify as a Zen Dome, the orgonite has to be precision-made, beautiful, and as unique as possible. Only the most effective orgonite is selected to become a Zen Dome.

[Orgonite Charging Plate](#)

I personally infuse each one with the intention of giving you the best results possible for your highest good. I also charge and activate the crystals within. In this way, each Zen Dome is made especially for you, so it will attune itself to your life force energy, producing maximum effect.

If you would like to see my beautiful collection of Zen Dome Orgone generating pyramids, half domes, diamonds, charging plates, pendants and shields, visit my website <https://www.karenholtonhealthcoach.com/shop/zen-dome-orgonite-products/> or [click here](#).

You can also email me: vials@shaw.ca to request my current Zen Dome catalogue in PDF.

I will soon add to my website a selection of pocket crystals suitable for restructuring water, adding aesthetic ambience to your environment, or for use in personal healing.

If you have any questions, contact me through my website or email me at: vials@shaw.ca

Testimonials:

“I am very, very pleased to say that the Zen Dome Orgonite that a dear Friend introduced me to is just wonderful! The amulet/shield alone, has made a significant difference to my health in the following ways:

- The headache, foggy brain, and other cognitive issues I have suffered from have all but disappeared;
- I have much more energy, and am clearer by far... with long hours and late into the night, and up early because I moved a week ago.
- Chronic pain in my shoulder and neck are substantially relieved – I can use my arm again!;
- I began using the Amulet/shield 4 days before my move, and I was astounded at how much strength, and energy... I had, and still have... really, really exceptional changes have occurred with less inflammation, aches and pains, etc...
- I just love the amulet/shield... and sleep with it too!
- Oh, and if I am over exposed, like in a store like Costco with horrible lighting and many people, and energies, if I begin to have my ‘overload’ symptoms... they disappear within an hour.

As well, I have the large pyramid, the sleep/meditation pyramid, and 2 Quantum Cleanse Diamond orgonite in critical places in my home. They are located in my CranioSacral Therapy session room, my bedroom, and near my computer and are very clearly doing their job... I sleep deeply and wake refreshed, my clients are pleased

[Large Pet Orgonite](#)

with their sessions, and as I know them well, we've discussed the pieces at length

All of the above amazing results are despite 2 smart meters on the same wall...down at the corner of the building... and the electrical panel on the room wall, and wifi upstairs.

Please note: I have been diagnosed as Electrically Sensitive and was almost housebound at one time, so for me to feel 'safe' with my amulet/shield in my pocket, and Zen domes in my home is really truly a God-send. Thank you Karen Holton. Best, Marian"

"These (Zen) domes are amazing!! Honestly, if it wasn't for a close friend who had recommended these to me for pain relief, I would've never found this shop, and/or would've been too skeptical to have even tried it. Little did I know after my first order that I too was also suffering from EMF. Symptoms that I had had for years, but didn't know what they were that limited me from watching TV or using my computer, went away. Just by placing one mini Zen Dome next to my laptop when I use it keeps my head clear and I'm able to focus and get my work done even if it takes hours without getting sick. I even tested taking the (Zen) Dome away and using the laptop...the symptoms came back. It is UN-REAL!!! I am still in amazement by how well they work and my plants love them too! A life changer! Bless Karen and James for getting them out there!" S.M.

Zen Dome Orgonite Guide 2018

Pure Heart Pyramid

How to Use Your Zen Domes

Improve your wellbeing with precision-made Zen Domes Orgonite (which include the influence of health positive crystals). Think of crystals as beautiful, spiritual friends with diverse personalities,

which communicate at hundreds of thousands of KHz – they pulse faster than the speed of light!

Crystals exist on a continuum bridging the realms of heaven and earth, and when combined with quartz in a matrix of organic resin and metals, they not only retune ambient negative energies, but also significantly boost the influence and properties of all crystals contained within.

I have personally experienced multiple health benefits from regularly keeping Zen Domes nearby. As the quartz crystals emit their specialized healing frequency (786,000 KHz), they amplify the vibration of the other crystals. Together, they emit an inaudible symphony of healing frequencies, which clear all of the chakras as they relax the body, and restructure the water and natural crystals (salts) found in our fluids and tissues. In this way, they are especially helpful during the *ascension process*, which is all about healing and raising our own unique resonant frequency signature.

Since Zen Domes clear the chakras and relax the body,

they promote wellness on energetic, physical, mental/emotional and spiritual levels. When you hold, wear or keep your Zen Domes close to your body, they interact directly with your energy field and promote the healing, grounding and balancing of your life force energies, which promote total wellness. When placed near water, beverages and foods, they restructure the molecules, which boost their energetic values and nourishment potential.

For this reason, I use the Zen Dome charging plate as a coaster/trivet under my beverages, bowls of hot foods and salads. You can keep one in your pantry, fridge and freezer to energize foods (when the charging plate is frozen it may break if dropped so be careful). You can also place one in your wine cellar, under your fruit bowl, beverage container or under your mattress, or pillow. You can add one to your pet bed but make sure the pet cannot use it as a chew toy.

Keep any Zen Dome orgone generator in your herb/patio garden, with houseplants or in your yard to help keep gardens of all kinds healthy and robust. One of my friends uses Zen Domes to help tree grafts to heal. Zen Domes are good for every living thing. The possibilities are endless.

[Orgonite Charging Plate](#)

Zen Dome Orgonite Guide 2018

How to Use Your Zen Domes

(Continued from Page 21)

I recommend that you keep a larger Zen Dome, (like the large or medium pyramid), in your vehicle and RV, and at the office. If you work out of doors, or in a public facility, wear a Zen Dome orgone generating pendant; or carry one of the shields, small Selenite Angel, or one of the mini diamonds in your pocket, purse or backpack. Don't forget to place a micro-mini Zen Dome cell phone/tablet shield on each mobile device you use.

For ultimate effect, I recommend setting up a grid of Zen Domes in your home and living spaces. Place one large Zen Dome pyramid at each of the 4 furthest corners of the home,

and 4 medium pyramids or diamonds at the half way points. Since budgets vary, start by wearing a Zen Dome pendant and place a medium Zen Dome pyramid by your bed at night. See how this feels energetically and add more as you feel the

Orgonite Pyramids

need.

[Springtime Joy](#)

I am confident that you will love these amazing devices as much as I do. Treat your friends and loved ones with Zen Domes at gift-giving occasions. When the social convention calls for flowers, why

not give Zen Domes instead?

Enjoy my new line of Zen Dome orgonite pyramids, shields, half spheres, diamonds, charging plates, pendants, and micro-mini cell phone/tablet shields – all available through my website. Email me at: VIALS@shaw.ca to request a PDF copy of this Zen Dome User Guide 2018.

[Orgonite Pendants](#)

[Orgonite Pyramids](#)

Zen Dome Orgonite Guide 2018

Zen Domes Orgonite Home/Office Grid Placement: Full size house or condo/apartment:

For ultimate effect, I recommend you set up a grid pattern of Zen Domes on each floor of your home or living spaces. Place one large Zen Dome pyramid ▲ at each of the 4 furthest corners of the dwelling, and 4 medium pyramids ▲ or Quantum Cleanse diamonds at the half way points. Then add one of your favourite Zen Domes ● to the centre. Your Zen Domes will interact

with each other as their frequency range is definitely increased when placed in this manner. Grid patterns do not need to be perfectly aligned.

Zen Domes Orgonite Room, Suite or RV Placement:

Regardless of the area you wish to clear energetically, you want to place your Zen Domes in a similar pattern to a crystal grid (diagram right).

The sun pattern on the left represents the energy pattern from your Zen Dome grid placement.

For smaller spaces, place a Zen Dome medium pyramid or Quantum Cleanse diamond

at each of the 4 furthest corners of the dwelling, and 4 small [pyramids](#) or Quantum Cleanse diamonds at the half way points. A centre placement should not be necessary.

If you are particularly sensitive to EMF, I also suggest the placement of a Quantum Cleanse diamond as close as possible to the smart meter, electrical panel, cell phone and other technologies.

If your budget is limited, start by wearing a Zen Dome pendant and place a medium Zen Dome pyramid by your bed at night. See how this feels energetically and add more as you feel the desire.

Zen Dome Orgonite Guide 2018

Orgone Energy by Ondrej Chladek

Orgone energy was originally discovered by Austrian psychiatrist and psychologist Wilhelm Reich (1897-1957) in his psychiatric work. This energy, however, has been known by different names for centuries by cultures all across the world, such as Chi or Qi. In Sanskrit it is expressed as Kundalini. Indian yoga adepts call it Prana and western cultures call it Ether or Vacuum energy, Universal life force, etc. Chi energy is an omnipresent energy, which gives birth to space-time itself, its matter content, and all the living organisms in it. The energy is of the cosmic origin and does not originate in our bodies, but the body receives this energy through our chakra system, and so it manifests itself physically.

Orgone energy consists of two components, positive orgone energy (POR = Positive Orgone) and negative energy, also called DOR energy (Deadly Orgone). Both of these components are always in balance with each other in the universe. There is abundant energy in space in various stages of quality and concentration, but the energy cannot be anywhere completely absent. It takes a form of statistically isotropic and homogeneous vacuum (quantum) turbulence and it has no weight (pure energy with no mass). This is one of the main reasons why it is very difficult to measure it by conventional techniques. However, literally everything arises naturally from this intangible field of orgone/vacuum energy. Orgone energy is the source of spin (rotation) of all things and elec-

tromagnetic and gravitational fields.

Orgone energy is attracted to concentrations of orgone energy. Unlike heat or electricity, which always show a direction from higher to lower potential, orgone energy flows from lower potential to higher potential. Entropy decreases as orgone energy is distributed more and more unevenly. However, it would be a mistake to think that the flow of orgone energy from lower to higher potential is only the reverse of the law of entropy or to try to represent these processes by thermodynamic equations by reversing the sign of the time parameter. Non-entropic organotic processes do not run their course mechanically; they are qualitatively entirely different from entropic processes.

They are, in fact, the processes responsible for the growth of all living things, for the process of learning, and for the evolution from simple to complex species.

In non-living nature they are responsible for the growth of clouds and storms within the atmosphere, and on a cosmic scale, for the growth of galaxies and the stars within them.

Continued on Page 26 →

Zen Dome Orgonite Guide 2018

Orgone Energy ... Continued from Page 25

Willhelm Reich described orgone as being a vital energy that could be demonstrated visually, thermically and electroscopically. He discovered that when non organic (metal) and organic material (e.g., wood or cotton) are mixed together in layers, this mixture would act as a magnet to this energy. He created big boxes with walls made of these mixtures where he would place his patients to receive high amount of orgone energy into their bodies. Reich patients were confirmed cured of different illnesses including high advanced stages of cancer.

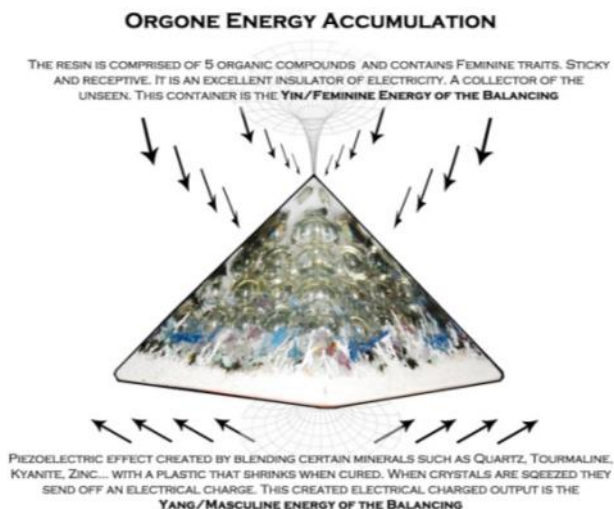

Dr. Reich developed several devices for the control of orgone energy. The most famous of these is the orgone energy accumulator. A closed box is formed by a system of layers of metallic and organic materials between which concentration of energy occurs. The organic layer of the orgone accumulator attracts and holds life energy from the atmosphere. The metallic layer of the orgone accumulator attracts and simultaneously repels the life energy in both directions. The organic layer re-passes the orgone energy back to the metallic layer. The metallic layer radiates the energy to the inside where it stays and has nowhere to escape.

The cloudbuster device, according to Reich's descriptions, consists of a special movable antenna resembling a large "pipe organ", which can be aimed at different parts of the sky. The device influences natural energy currents between the atmosphere and the ground, and when used in certain specific ways, wind and weather patterns respond accordingly. When used correctly, the device is

able to cause huge changes in weather.

An orgonite can be any device that uses alternating layers of organic and non-organic materials in various settings or a mixture of catalyzed organic resin with metal shavings, particles or powders, poured into a mold. This mixture of resin and metal particles works similarly to Reich's accumulators. Energy is repeatedly reflected by metal particles and, as a result of this process, its vibration increases. A couple of crystals can be added to the mixture for their ability to make the energy more coherent and to enhance a specific function of the orgonite. The energy is purified and it is radiated back to its surroundings as a vital healthy energy, enriched and synchronized with healing minerals contained in the orgonite mixture. Thus orgonite is basically a substance which functions as an energy transmutation device, drawing in negative life energies and EMF pollution and transmuting it into positive life energy. Orgonite does not need any external power source, so it is possible to use

Zen Dome Orgonite Guide 2018

Sacred Geometry by Ondrej Chladek

Before the universe came into being, there were only two things; existence, and non existence. In actuality, there was only one thing, as non existence cannot be a thing, things inherently imply existence. Thus is the void, a vast nothingness, of, well, nothing. No movement, no sound, no light, no space, no time, NO THING. But the paradox lies within this definition; if there is no thing, we must first have the notion of THING for there to be an observation of this “lack” of existence. We are here now, and we are things, thus there MUST have been some THING that existed alongside No Thing, and it must have had the qualities within it that set it apart from non existence. This Thing, as you’ve guessed, is God, Source, Singularity, Consciousness. It is EVERY-THING contained in One THING.

Sacred geometry is the study of the fundamental patterns, structures, processes and principles that are at the foundation of reality, and the application of this knowledge in the design of human social and technological systems.

Throughout nature, at all scales from micro to macro, we can see and discern patterns, structures and processes that are common to all manifestation. For example, the vortex spiral is clearly present in galaxies, in the gas clouds of planets, in our own clouds and the oceans of Earth, in hurricanes, tornadoes, in our sinks as water drains, in plants and shells, and even in the flow of hair at the back of our heads. These same patterns are also present at the micro scale in cells, DNA molecules, and in atomic structures.

The spiral is one pattern in an array of patterns, structures

and processes found throughout the cosmos that combine to reveal a whole unified model of what we call a cosmic geometry—a geometry—that underlies all form and process.

Though often we can only see a small portion of this unified model, such as the vortex in the examples just mentioned, there is emerging at this time an understanding of the integrated whole system of which the vortex is a part.

Universe and the natural systems found in it are exemplary of sustainable design. For 14 billion years the cosmos has evolved without depletion of energy as a whole. Life on Earth has experienced many a radical change over millions of years, yet all in all it continues to thrive when left to its own natural evolutionary processes. And yet now the impacts of its preeminent species, human beings, are clearly affecting the balance of natural systems on this planet which are increasingly exhibiting rates of change towards instability and potential systems collapse with every scientific investigation. Continued on Page 30 →

Sacred Geometry ... Continued from Page 29

Nature will eventually return to a state of balance, as it always does, but the consequences may be extremely challenging and potentially fatal for humanity and many life forms affected by these changes. It is well known that the extinction rate of species is now as much as 1000 times the natural background rate, a significant cause apparently being human impacts on ecosystems, habitat and the biosphere as a whole. It is clear that the course we are on is not sustainable, let alone one by which we and all life can thrive. In order to address this dilemma, to course correct our trajectory, we must now embrace a paradigm shift in the understanding of what constitutes a sustainable, thriving system. The assumptions of how to design our economies, our educational and political systems, our communications media and its truly effective use, and all our human-contrived social and technological constructs, are generally based on an old and very limited perception of how life and the cosmos actually work. At a fundamental level of understanding, we humans have built our world based upon beliefs and perceptual frameworks that are grossly limited in their sustaining effectiveness simply due to the fact that they do not include a large portion of understanding about what constitutes a whole and sustainable system. We are fortunate, though, to have arrived at the threshold of awakening to a new paradigm of the fundamental perception of how cosmic design, at all scales, innately produces sustainable systems, and what the factors are—the patterns, structures, processes and principles—that comprise these systems.

In the first half of the 20th century, Buckminster Fuller began exploring a new way of understanding nature's patterns, structures and processes which developed into one of his life's

Zen Dome Orgonite Guide 2018

Sacred Geometry ... Continued from Page 31

Following the foundational groundwork of Fuller's Synergetics, a number of pioneering researchers have begun to expand our understanding of this new paradigm, perceiving in nature the underlying processes and principles that are at play in the design of healthy living systems. One essential understanding is that nature inherently includes feedback loops in such systems, a self-reflexive process by which the system learns from its environment, adjusts accordingly to maintain balance and well-being for itself and its surroundings, and communicates back out to its environment new patterns and behaviors that exhibit these adjustments and informs the living system as a whole. The form that underlies this process is the torus.

This form can be seen literally and discerned conceptually in all natural systems, from blood cells and biological processes, to the resource exchange of plants and animals with their environment, outward to the macrocosmic realms of planets, stars and galaxies, and inward to the microcosmic elemental and atomic realms. The synergetic geometries and toroidal flow patterns appear to be fundamental to all cosmic creation. With this greatly increased understanding of the fundamental patterns, structures, processes and principles of cosmic manifestation now emerging in consciousness we have a new

opportunity to design our human systems based upon a more whole, integrated and naturally sustainable design foundation. Here's an example of how doing so can greatly enhance the efficiency of our technologies.

“A three-dimensional logarithmic spiral is found in the shells of mollusks, in the spiraling of tidal-washed kelp fronds, and in the shape of our own skin pores, through which water vapor escapes. Liquids and gases flow centripetally through these geometrically consistent flow forms with far less friction and more efficiency. PAX Scientific (USA) has designed fans, propellers, impellers, and erators based on this shape.

Computational Fluid Dynamics and Particle Image Velocimetry tests showed the technology's streamlining effect can reduce energy requirements in fans and other rotors from between 10 and 85%, depending upon the application; the fan blade design also reduces noise by up to 75%. The first air-handling products scheduled for release are fans in computers, auto air-conditioners, and kitchen range hoods. The Pax streamlining principle could also lead to improvements in industrial mixers, water pumps, marine propellers, and devices for circulating blood in the body.” Source: Biomimicry Institute, <http://biomimicryinstitute.org/case-studies/>

Sacred Geometry ... Continued from Page 33

By simply aligning the design of technologies with the patterns and ratios that nature incorporates we are already gaining efficiencies in basic systems and technologies that clearly lead to the development of sustainable solutions. Imagine applying this kind of knowledge to the design of all of our human systems, not just the technological ones. Imagine a media and communications system that is designed to not only broadcast information but to also provide a feedback mechanism that allows for a self-reflexive and adaptive environment of learning and exchange for all involved. With the capabilities now at hand through Internet media we can do exactly that and for the first time empower our communities to create their own news, provide vital information needed to make informed decisions, and feedback into this communication system the choices best suited to evolve into a healthy and thriving community system. The same fundamental principle applies towards creating balanced and effective political, educational and economic systems locally and for the world as a whole.

Sacred geometry offers a deep inquiry into this emerging field and a means to present and promote this knowledge as a foundational basis for the design of sustainable and healthy living systems.

Humanity is challenged to shift our ways rapidly so as to tip the scales back towards a balanced and healthy planetary ecosystem. Old paradigm solutions cannot meet these challenges, and in fact are a primary contributor to the cause of the problems we face. We must now look deeply into the underlying constructs of the unified whole of nature and the universe, not only from a scientific perspective but from the innately intuitive realization that we are truly awakening to a new paradigm of unity consciousness and the intrinsic interconnectedness of all things.

The deeper study of the principles of sacred geometry causes better connection between our hemispheres. Right cerebral hemisphere, intuition and creative, simple and without logical analysis, experiencing a perception of reality here and now as it is. Left cerebral hemisphere analyzes the contrary, in time and space, distinction, evaluates, compares and logically examines. Perception and understanding of sacred geometry, drawing, or just watching the various shapes, the harmonization and communication of hemispheres occurring and one enters into a single type of consciousness and perception of reality.

Using Zen Domes in Healing/Spiritual Rituals

Many people are familiar with using crystals for healing, and for spiritual rituals like grid-making, but did you know that you can maximize these practices with the use of Zen Domes orgone generators?

Any purpose which calls for crystals is an opportunity to use and program your Zen Domes. There is no earthly limit to how much data can be recorded by the crystals in Zen Domes Orgonite, although I usually suggest this data follow a theme.

Themes such as health, abundance, security, wellbeing, new paradigm awareness, peace, balance, love, gratitude—all of the frequency-raising purposes are suitable.

Switch out some of your crystals with Zen Domes. Continue to use some crystals along with Zen Domes Orgonite because the Zen Domes will actually boost the healing power of those crystals.

You may have favourite crystals which differ from the ones contained in the Zen

Domes orgone generators, so keep using them to your benefit.

I suggest placing the 7 Chakra Orgonite Disc Set directly on your chakra points while you meditate. Place them on the chakras you wish to strengthen or fortify. Your chakras are linked directly to your star-gates so it is very important during this time of accelerated evolution that we keep our energetic pathways clear and bright.

[Orgonite Chakra Disc Set](#)

[Orgonite Pendants](#)

You can use any of the Zen Dome Pendants in the same manner. The Dragon Pendant will strengthen the male/god part of us and the Goddess Pendant will strengthen the female/goddess energies. These Zen Domes are great for balancing the Divine Male and Divine Female energies within. These connections also serve to anchor divine energies into our

Earthly energy grid. Since we are all connected, heal yourself and you heal the world.

Using Zen Domes in Healing/Spiritual Rituals

Continued from Page 37

The Tree of Life and the Flower of Life pendants are also great to place directly on the chakras. The Flower of Life pendant promotes the spiritual/angelic energies, while the Tree of Life pendant is used for more intense care and healing.

Orgonite Pendants

The Chakra Copper pendant is used to promote a more dynamic healing of the self and others. If you are in the sensitive stage of the *ascension process*, I recommend starting with the Flower of Life pendant, and then when you are in a position for something more intense, graduate to the Chakra copper pendant.

Many people are embracing practices like smudging and healing circles.

Smudging is very complimentary to the use of Zen Domes and can be used on orgonites before infusing them with new/fresh intentions.

The crystals in the Zen Domes love being smudged. It is a great way to strengthen your relationship with them!

For use in healing ceremony/ritual I recommend placing a large Zen Dome in the centre of the circle. Then in grid-like fashion place any Zen Dome: like the Medium or Small Pyramids,

Charging Plate, Half Sphere, Moon Glow Diamond, Quantum Cleanse Diamond and the Round Shields within the circle/group.

[All Zen Dome Orgone Generators](#)

Alternative Health Practitioners and Energy Healers can easily incorporate orgone generators into their practice. By just keeping one of the more robust Zen Domes within the healing area, the treatments will be more effective. I recommend using the Large & Medium Pyramids, and the Quantum Cleanse Diamond within the treatment

area.

Whether for use in the home or practice, experiment a little and enjoy!

Good Health to You!

Tapping Into Wellness With Denise Dueck

- * EFT Tapping Practitioner
- * Energy Healer
- * Intuitive Healer

While tapping on the meridian lines of our energetic bodies, we can disassociate an emotion from a traumatic event and/or core beliefs. It is a natural and effective self help tool for releasing pain, stress, fears, negative emotions, and inner critic beliefs.
